SOLAREZ Low VOC resin is a low styrene emission orthophthalic polyester resin that is ultraviolet curable. It rapidly cures (<3 min.) upon exposure to the safer UVA light (365-400 nm.) amply available in natural sunlight and low-wattage fluorescent suntan bulbs. It is enhanced with UV stabilizers that greatly improve its weatherability. Curing commences within 30 seconds of exposure to mid-day sunshine in non-polar latitudes. Ambient temperatures as low as -20°F or as high as 120°F have little effect on cure time or physical properties of Solarez.

**TYPICAL PROPERTIES OF CURED CASTING @ 77°F** (guidance only)
1. Tensile strength 9,600
2. Tensile modulus, psi x 10^6 0.52
3. Tensile elongation, % 3.0
4. Flexural strength 19,000
5. Flexural modulus, psi x 10^6 0.52
6. Compressive strength, psi 17,000
7. Barcol hardness 40
8. Heat deflection temp, °F 180

**TYPICAL LIQUID PROPERTIES:**
- Viscosity, Brookfield, cps 450
- Appearance Clear
- DOT Flammability Rating, °F 76-100
- Monomer content % 35

**Handling:** SOLAREZ resin contains ingredients that could be harmful if mishandled. Contact with skin and eyes should be avoided and necessary protective equipment and/or clothing should be worn. For important health, safety and handling information, consult the MSDS before using this product.

**Storage:** Store @ temperatures below 80°F. Keep away from heat, sparks and open flame. Handle only in diffused light -- never in direct sunlight. Direct sunlight will cause rapid curing of resin.

Solarez is available in polyester, epoxies, urethanes as well as other resin families.

Wahoo International 6074 Corte Del Cedro - Carlsbad, CA 92011 (760) 476-3559
